

Transform Your Enterprise Unstructured Data into AI-Ready Knowledge

80% of enterprise data is currently locked in unstructured formats like emails, PDFs, calls, messages and notes. Without a reliable way to use this data, teams and AI agents operate on partial information, leading to hallucinations, inaccuracies & missed opportunities. Flexor creates a single pane of truth by turning enterprise unstructured data into the reliable, decision-ready context your teams and AI agents need to succeed.

How Flexor Works

Flexor unifies, standardizes and contextualizes messy data into a ready-to-use layer of truth. The AI Context Engine runs tailored LLMs and VLMs automatically to pre-process, contextualize, normalize and standardize your data at scale across formats and sources, ensuring every model and workflow is powered by clean, consistent, trustworthy data.

The Flexor Effect

Get Your Unstructured Data Straight into Your Data Warehouse

- Unified** - Bring unstructured data from multiple sources into your existing workflows
- Contextualized** - Business and data context preserved and enriched
- Enterprise-grade** - AI explainability, lineage, security and privacy built in

Built for the Enterprise

Flexor was built from the ground-up with the safety of your data in mind, and complies with leading industry standards

Trusted by Leading Companies Across Industries

Transforming PDF Contract Chaos in a \$4B Procurement Operation

Flexor analyzed thousands of fragmented, unstructured PDF contracts, allowing the client to proactively manage renewals, secure the most competitive vendor terms and unlock millions in savings across its \$4B procurement operation.

Millions saved annually

Turning Customer Drop-Off Chats into \$33M Savings

Flexor transformed 140,000+ customer calls and chats into actionable context, identifying drop-offs in the exchange process, allowing the retailer to intervene and guide customers to completion, saving a large US retailer \$33M.

Faster time to ROI

Achieving 90%+ KPI Accuracy Across Thousands of Company Records

Flexor transformed unstructured CRM data, meeting notes, PDFs, decks and reports from hundreds of portfolio companies, achieving 90%+ accuracy across critical KPIs including ARR, revenue, cash, and runway, to enable better, faster investment decisions.

Improved accuracy & consistency
